Self-Critique

- **What did we do well?**
 - User friendly design, well organized layout, visually appealing
 - Substantial amount of instances available
 - Effective communication through regular meetings and using Slack
- **What can we do better?**
 - Provide more data
 - More appealing splash page
 - More multimedia on our instance pages
- **What did we learn?**
 - Working with APIs
 - Using Django framework and accessing the PostgreSQL database
 - Front end development and using Bootstrap CSS library

Developer Critique (for afternoon-1)

<https://databaseengine.appspot.com/>

- **What did they do well?**
 - Maintained their theme very well through design and color scheme
 - Error handling for page not found
- **What did we learn from their website?**
 - It is possible to do YouTube videos in a carousel page
- **What can they do better?**
 - Optimize card size so that their grid pages have uniform cards and fit on a standard webpage
 - Lacks basic functionality: filtering & sorting
 - Reduce the amount of text on webpages
 - Clicking on the Oscars logo in the top left just adds a “#” to the URL, no rerouting
- **What puzzles us about their website?**
 - Distracting background on splash page
 - Some pages have only sorting even though it's labeled filtering

Conclusion

- Thank you for listening!
- Are there any questions or comments?
